First Eyewitness Report of Interior

**Spacecraft Looks Like A Furnace**

A farmer out in Western Oklahoma was startled last night when he pulled up his car to inspect a strange object lying in the road. The farmer said he was startled by what looked like a small, silver, disc-shaped object with a glowing light behind it. He estimated the object was about 10 feet in diameter and had a metallic sheen.

The farmer, who wished to remain anonymous, said he was on his way home from a night job when he spotted the object. He said it appeared to be moving slowly across the field and then suddenly stopped.

The farmer said he immediately got out of his car to investigate, but as soon as he stepped away from his vehicle, the object began to emit a bright light and a strong heat. The farmer said the light was so intense that it blinded him for a moment.

He then heard a loud noise, and when he looked back, he saw the object had disappeared. The farmer said he was too frightened to return to the scene and left the area as quickly as possible.

The farmer said he reported the incident to the local sheriff, who is currently investigating the matter.

**Regents May Know This Week**

**OU Proxy Choice Near**

University of Oklahoma Regents may know this week who will be the new OU president.

"We are very pleased with the quality of the candidates," said Barry B. Nissan, chairman of the Regents, said Friday.

"Frankly, there would be 10 candidates, but we may not be able to make an announcement," said B. Johnson.

He said any announcement would be too long after the new OU president's term begins.

"We are going to continue working during the 1987-88 school year," said B. Johnson.

"At this time, we do not have an announcement," said B. Johnson.

"The search will continue."
