How The War Goes On Poverty

Although there has been some relaxation in world prices, the situation in America is still better than it once was. The current price situation is a direct result of the policies followed by the United States government and the United States people. The United States has been able to maintain a high level of production and to hold the prices of many of its products. The United States has also been able to maintain a high level of employment and to keep the prices of many of its products. The United States has also been able to maintain a high level of employment and to keep the prices of many of its products.

The low prices of many of the products of the United States have not been due to a lack of demand. The United States has been able to maintain a high level of production and to hold the prices of many of its products. The United States has also been able to maintain a high level of employment and to keep the prices of many of its products.

HERE'S WHY!

Read why prices have been so drastically cut for this sale - then hurry to 800 S. Western. Doors open today at 9:00 A.M.

During the past few weeks we have accumulated hundreds of odd and ends for dozens of reasons. The major market starts a few days and suppliers have announced what will be discontinued. Stock must be sold. Floor samples have accumulated. They must be sold. Transfer of Midwest City, Norman and Northwest Store stocks resulted in lots of damage. This must be sold. Because there is so much of it and because it is all uncrated we have taken even greater price cuts to assure selling it out quick. All sales are final and we cannot hold any orders but the prices justify this. You are welcome to just come and browse through the thousands of great buys.
