Announcement Due Today

New OU Chief Arrives

By RICHARD MARSHALL

Oklahoma City Journal

The University of Oklahoma will have a new president beginning July 1.

The Board of Regents announced the appointment of Dr. Paul C. Miller, who has served as interim president since the resignation of Dr. James E. Snow in December 1976.

Dr. Miller, 58, is currently the provost and vice chancellor for academic affairs at the University of Kentucky.

He has a Ph.D. in chemistry from the University of Illinois and has served as a professor and department chairman at the University of California, Berkeley, and the University of Texas, Austin.

Dr. Miller will take office on July 1, replacing Dr. Snow, who has served as president since 1971.

Dr. Miller is a native of Oklahoma and a graduate of Oklahoma State University. He has been at the University of Kentucky since 1970.

He has been involved in various academic and administrative positions throughout his career, including serving as the dean of the College of Arts and Sciences at the University of Kentucky.

Dr. Miller is married to the former Mary K. Miller, who is also a professor at the University of Kentucky.

She has a Ph.D. in educational psychology and has served as a professor at the university since 1975.

The couple has two children, Jane and John.

Dr. Miller has also been active in various professional organizations, including serving as president of the American Chemical Society.

He has received numerous awards and honors for his contributions to education and research.

Dr. Miller’s appointment is effective immediately, and he will be responsible for leading the University of Oklahoma into the next phase of its development.

His appointment comes at a time when the university is facing significant challenges, including budget cuts and declining enrollment.

However, Dr. Miller and the Board of Regents are confident that the university can overcome these challenges and continue to provide a high-quality education for its students.

Dr. Kamm's Regime Vortex Of Controversy

By J. T. CARVER

Dr. Kamm’s regime, which has been in power for the past five years, has been the subject of much controversy. Many people have been critical of the way the regime has handled such issues as education, foreign policy, and the economy. The regime has responded by increasing its control over the media, which has led to censorship and self-censorship. This has resulted in a lack of free speech and a decline in the quality of public debate. The regime has also been accused of corruption and abuse of power, which has further eroded public trust. Despite these challenges, the regime continues to hold power, and its supporters believe that it is the best way to ensure stability and progress.
