Rise Predicted In Swimming Pool Drownings

During the current water emergency, the Lifesaving Association of America (LAA) has predicted a rise in drownings in swimming pools, beaches, and rivers. This is due to the increased number of people seeking relief from the heat.

The LAA advises that everyone should be aware of the dangers associated with water activities. They recommend that individuals and families take necessary precautions to avoid drowning incidents. These include:

1. Supervision: Children should always be supervised by an adult when in or near water.
2. Safety equipment: Use of life jackets is highly recommended.
3. Skill: Ensure that individuals are capable of swimming and saving themselves and others.
4. Water safety education: All members of the family should be educated about water safety rules and practices.

Drownings are a preventable tragedy. By following these guidelines, we can reduce the risk of drowning incidents and ensure a safe summer for everyone.
