San Francisco is brushing off some of the worst memories of its long-haired set Friday proclaiming the "death of the hippies". The enemies said they were dead in the morning.

The "LSD" and hallucinogens phrase also included a group that was operating under the term of "counter-culture" in the San Francisco area.

The "LSD" phrase was later taken to include all drugs that cause a temporary change in consciousness, including marijuana, LSD, and other hallucinogens.

The counter-culture movement in the United States began in the late 1960s and continued through the 1970s.

The Inside News

Highflying Nelson Brooks of the UAC's Lambeth, Ga., and Bill of the Red Cross in New York led the third of three regional forums on the "inside news" today.

The forum focused on the role of media in shaping public opinion and the challenges facing journalists in a rapidly changing world.

"Insiders" are a group of journalists and media professionals who work on the inside of news organizations, often with access to confidential information.

The Inside News is a regular feature of the Oklahoma City Journal, offering insights into the workings of the media and the news industry.
**Freeze Chills Highway Jobs**

The next highway construction project will be in the works near the city's airport. Officials have announced plans for the construction of a new bypass road that will connect the city's downtown area with the airport. The project is expected to create over 100 new jobs for local residents, with construction set to begin next month. The new road is expected to alleviate traffic congestion in the area and improve transportation for both residents and businesses.
