Inflation, Tight Money Tug At Reins

By JIM KENDALL

The prospects made new for sales, production and output at Oklahoma City's manufacturing plants, according to a recent survey of business headquarters, are now more favorable than at any time during the past two years.

The survey, conducted by the Oklahoma City Chamber of Commerce, shows that the manufacturing sector is expected to grow at a rate of 3.5% this year, compared to a 1.0% decrease in 2019.

The survey also found that businesses are planning to increase their investments in new equipment and technology, with a focus on improving efficiency and reducing costs.

The survey results indicate that businesses are more optimistic about the economic outlook for the next year, with the majority predicting an increase in sales and profits.

Uranium Plant Taking Shape

Construction is expected to begin in the first quarter of 2022, with the plant expected to be operational by the end of the year.

The plant will have a capacity of 600 tons per year and is expected to produce 50,000 pounds of uranium per year.

The project is being funded by a $45 million grant from the US Department of Energy and is expected to create 150 jobs and $15 million in annual payroll.

Overall, the survey results indicate that the manufacturing sector in Oklahoma City is expected to grow at a rate of 3.5% this year, compared to a 1.0% decrease in 2019.

The survey also found that businesses are planning to increase their investments in new equipment and technology, with a focus on improving efficiency and reducing costs.

The survey results indicate that businesses are more optimistic about the economic outlook for the next year, with the majority predicting an increase in sales and profits.

Western Electric Payroll

It's Economy Booster

The annual payroll distribution in 2022 is expected to boost the local economy by $50 million, according to a recent report.

The report estimates that the annual payroll distribution will benefit businesses such as local retailers, restaurants, and service providers.

The report also estimates that the payroll distribution will create 1,000 new jobs and generate $10 million in new tax revenue for the city.

Overall, the survey results indicate that the manufacturing sector in Oklahoma City is expected to grow at a rate of 3.5% this year, compared to a 1.0% decrease in 2019.

The survey also found that businesses are planning to increase their investments in new equipment and technology, with a focus on improving efficiency and reducing costs.

The survey results indicate that businesses are more optimistic about the economic outlook for the next year, with the majority predicting an increase in sales and profits.
YEAR TO REMEMBER ON STREET

NEW YORK — It won't be easy for Wall Street to forget 1968 but traders in the city's famous financial district expect to be busier next year. As a result, the market may be more volatile in 1969.

The New York Stock Exchange (NYSE) has seen a rise of 2.9 percent in the last three years, but Wall Street executives believe it will be more volatile in 1969.

The market has been very volatile in recent years, with some big gains and losses. The Dow Jones Industrial Average (DJIA) rose 22.9 percent in 1968, while the S&P 500 Index (S&P 500) was up 16.7 percent.

However, the market may be more volatile in 1969 as traders expect the Federal Reserve to raise interest rates.

Meetings Set On Skills Academy

Governor To Push Aid To Minority Groups

Gov. David Boren said Thursday that his administration would push for aid to minorities in the Oklahoma Skills Academy.

"We need to make sure that every child in Oklahoma has the opportunity to succeed," Boren said.

Farmers Buy Crop 'Safety'

The Oklahoma Skills Academy, a program designed to provide agricultural education to students in the state, will be expanded to include minority groups.

"We need to ensure that all children, regardless of their background, have access to quality education," Boren said.

Ethics Bill OK Urged

The Oklahoma legislature has approved a bill that would ban certain practices in the state's financial institutions.

"We need to protect consumers and ensure that our financial institutions are operating ethically," Boren said.

The bill has been signed into law by the governor.
END TO SPENDING NOT LIKELY

WASHINGTON, Jan 10 -- A top Senate Democrat said Monday that it is unlikely there will be a reduction in federal spending when the new Congress convenes in February.

"There is no intention to spend less," said Majority Leader Robert Byrd (D-W.Va.). "We are going to be spending money to meet the needs of the American people." Byrd said that the Senate would have to consider cutting in areas "if the spending spree is not stopped".

The Senate has been considering a wide range of federal spending proposals, including a $46 billion emergency aid package for the states and a $20 billion package to help the elderly. The proposals have faced resistance from some Republican senators, who have argued that the government should not be spending more money than necessary.

BYRD: "There is no intention to spend less. We are going to be spending money to meet the needs of the American people."

Nixon May Join LBJ, Ask To Continue Surtax

By ROBERT L. STEPP

The Washington Post

President Nixon is expected to join President Lyndon B. Johnson and his top economic advisers in urging Congress to extend the surtax for two more years.

"The President and I have been meeting with a lot of people in the past few days," Mr. Nixon said, "and we have been discussing the need for the surtax to continue to help meet the challenges of the future." Mr. Nixon said that the surtax would provide "a steady flow of revenue to meet the needs of the American people".

The surtax, which was enacted in 1969, raised income taxes by 10 percent for individuals earning more than $40,000 and by 20 percent for couples earning more than $80,000. The current rate of the surtax is 50 percent for individuals and 60 percent for couples.

Nixon said that the surtax "will help to ensure that the rich pay their share of the cost of running the government," and that it "will help to ensure that the country has enough money to meet the challenges of the future."

FOOTNOTES

An important aspect of the electronics industry is the growth of system integration, where electronic equipment is no longer isolated as separate components, but is integrated into a single, cohesive system. This integration allows for more efficient and effective operation, often leading to lower costs and improved performance. As a result, the demand for electronic systems is increasing, particularly in the defense and aerospace sectors.

Additionally, the growth of personal computing and the internet has led to a surge in demand for electronic components and devices. This has driven innovation in technology, leading to the development of new and improved products. The design of electronic systems is becoming increasingly complex, requiring a multidisciplinary approach that draws on expertise from various fields, including computer science and electrical engineering.

In conclusion, the electronics industry continues to evolve rapidly, driven by advancements in technology and changes in market dynamics. Understanding the underlying trends and challenges is crucial for companies to stay competitive and innovate effectively.
