President Asks Help From Ike

WASHINGTON (UPI) - President Dwight D. Eisenhower said yesterday he has asked United Nations Secretary General Dag Hammarskjold for a special meeting of the Security Council to discuss the situation in the Middle East.

Eisenhower said he had asked for the meeting because of the increasing tension in the region and the possibility of a full-scale war.

The president said he hoped the meeting would be attended by the leaders of all the countries involved in the dispute, including Arab nations, Israel, and other powers.

The request came after a series of meetings between U.S. officials and other countries in the region, including the Israelis, who have been seeking a way to end the conflict.

BOMBING Halt Producing Surprising Results In Vietnam

By HAROLD EAGLESON

HANOI, North Vietnam—(AP)—Bombs have stopped falling on the country as it was partly intended to do, nearly three years of U.S. bombing have killed 120,000 and drained the North Vietnamese more than they have ever been in their turbulent history.

The United States has become aware of the growing numbers of people who have been killed in the U.S. bombing. Sixty percent of the people in the 30-kilometer-wide area have been killed, and more than two million have been killed in Vietnam.

The principal cause of North Vietnam's explosion of population is its food crop failure, which has caused famine in many areas. North Vietnam's food production is 40% below the national average and has been reduced from 18% to 5%.

For more information, the most important diplomatic and political goal of the United States is to maintain a stable and prosperous nation. If the U.S. bombing continues, it would lead to more instability and political unrest.

The U.S. government must make a decision whether to continue the bombing or to negotiate a peace agreement. If the U.S. government continues the bombing, it will lead to more political unrest and instability in North Vietnam. If the U.S. government negotiate a peace agreement, it will lead to more political stability and prosperity in North Vietnam.
