College With New Thrust

Oklahoma College of Liberal Arts may be one of the more beautiful college campuses in the state, but at least one student group finds it hard to live up to the name of liberal arts.

According to reports, several students have been struggling to keep up with the rapidly changing curriculum.

In keeping with the traditional emphasis on education, the college offers a variety of courses that are intended to prepare students for success in the classroom.

They are offered in order to meet the requirements of the state's Department of Higher Education and are part of the curriculum.

The college has a strong focus on providing a well-rounded education, and students are encouraged to take courses in a variety of subjects.
