We often think of the outdoors as a setting for rough-and-ready, rugged adventures. But what if we could blend the thrill of the great outdoors with the comfort of home? Imagine setting up your campsite with a unique twist: think about integrating elements from your own home or daily life. Tuna Potato Salad Satisfies Appetite During Hot Weather

Cool Summer Eating

When days are hot, the desire for cooling, light, crisp salads that can be prepared ahead of time and eaten cold is at its height. One is tempted to try to create an al fresco lunch or dinner of tossed salads, fruit, and ice cream. Some people get together and order a picnic lunch, while others instead use a family reunion as an excuse to have a sandwich lunch or dinner.

For all of these situations, this recipe for a cold salad is a good choice. It is the perfect size for one or two persons to eat as a main dish or to serve as part of a larger meal.

Ingredients:
1 can (4 oz) tuna
2 medium potatoes
1 small onion
1/2 cup mayonnaise
Salt and pepper

Instructions:
1. Drain tuna and add to potatoes. Coarsely chop potatoes and mix with tuna.
2. Dice small onion into potatoes and tuna mixture.
3. Add mayonnaise, salt, and pepper to taste.
4. Chill for 1 hour before serving.

Food Tips

Canned tuna is widely available, and it is a good source of protein. It is a good alternative to fresh fish, which can be expensive and not always fresh. It is also a good source of Omega-3 fatty acids, which are beneficial for heart health.
