GREATEST SHOW ON EARTH

Or In Space, That Is

Houston — Seth Bedell, 52, and Alain Berteaux, 35, stood in the main exhibit area at the Johnson Space Center, looking at the Soyuz rocket that will carry them to the International Space Station.

"This is the best view you can get," Bedell said. "The Soyuz will be launched from Baikonur Cosmodrome in Kazakhstan on Wednesday, and we'll be there for the launch." Berteaux added, "We're excited to be a part of this historic event." A Soyuz rocket later launched from the Baikonur Cosmodrome, carrying Bedell and Berteaux to the International Space Station.

U.S. Report: Storing Gas on Okinawa

Okinawa, Japan — The U.S. Department of Energy has selected Okinawa, Japan, as the site for a new underground gas storage facility. The site will be used to store natural gas, which is currently used to generate electricity in the region.

"Okinawa is an ideal location for a new underground gas storage facility," said Bruce Anderson, the leader of the project. "The site has a large underground storage capacity, and the weather in Okinawa is consistent throughout the year, which makes it a perfect location for the project." Construction of the facility is expected to begin in 2024.

Fratellis are using the same construction in Rapid City, S.D., that was used in Oklahoma City, as part of the rapid deployment of security measures following a deadly shooting this summer.
