U.S. READY TO DIVIDE VIETNAM

Panel OKs Major Tax Reform Bill

WASHINGTON, D.C. — The House Ways and Means Committee has approved the most extensive federal tax reform plan in history, calling for a sweeping overhaul of income taxes and providing for the largest tax cut in history. The bill, which calls for a $10.6 billion tax cut, will be voted on Friday, June 15, 1979, and is expected to be passed by the House on Friday. President Jimmy Carter, who has been reported as favoring the bill, is expected to sign it into law this week. Carter has been praised for his leadership in greatly reducing the national debt and making the U.S. economy stronger and more competitive in the world market. The bill is also expected to make federal tax policy more efficient and equitable. For the first time in history, the federal government will have a balanced budget. Carter's leadership has been praised for his efforts to cut the national debt. Carter is expected to sign the bill into law this week.
