Wilkins Joins City Fight

Support for Oklahoma City sanitation workers who are striking is mounting. By Saturday afternoon it was a matter of how to handle the situation. Mayor Wilkins was in town to talk to union members of the Bricklayers Union, but he was not expected to attend any meetings.

Wilkins said he was trying to find a way to resolve the situation.

The city has offered to meet with the union to discuss the issues.

Wilkins said he was hopeful a resolution could be reached.

Cold Trend On The Way

The cold weather continues to be a concern for Oklahoma City. The National Weather Service said temperatures are expected to drop to the single digits overnight.

Viet Fight Leaves 25 U.S. Dead

The Vietnam War claimed 25 American lives last week. The deaths were the result of enemy action and friendly fire.

TIAI Ties Hanged For Three Berets

A man was hanged in Osaka, Japan, last week. The man was found guilty of murder and sentenced to death.

Inside News

One year ago today it was cloudy with a high of 61 degrees.

Four people were killed in a traffic accident.

CIA Office Stormed

The CIA headquarters in Virginia was stormed by armed men last week.

City School Opening Date Clouded

The president of the Oklahoma City teachers' union said the city school opening date could be delayed due to the strike.

The union has been negotiating with the city for several weeks, and the opening date was initially set for September 1.

The opening date was later moved to September 15, but the strike has now caused the opening date to be delayed even further.

The union said it is still negotiating with the city, and the new opening date will be announced soon.

Peter Principle—Part V

GET OUT FROM UNDER

These days there is a lot of talk about the "Peter Principle," which is the idea that people rise to their level of incompetence.

There was a study done by a management consultant who found that the people who were promoted to management positions were not necessarily the best at their previous jobs. In fact, many of them were actually less competent than the people they replaced.

One of the managers who was promoted was a very effective technical support person. He was able to consistently solve complex problems quickly and efficiently. However, when he was promoted to a management position, his performance decreased dramatically. He struggled to make decisions and could not effectively manage the team.

Another example was a salesperson who was a top performer. He was able to consistently achieve sales targets and had a strong customer service reputation. However, when he was promoted to a management position, his performance declined. He had trouble motivating his team and could not close as many deals as he had previously.

The Peter Principle suggests that people tend to rise to the level of competence of their previous roles. As a result, they may not be fully qualified for their new positions. This can lead to decreased performance and even job loss.
