Heroes... Or Heels?

Tucked away in the back of the classroom, "the Green Berets" have become a part of the history and legend of the college. Since their formation in 1942, they have faced many challenges and have been true to their name as "the best of the best."

No one is more aware of this than John W. Banta, who played a key role in the history of the Green Berets. He told his own story to us in a recent interview.

"I helped start them," he said with pride.

Banta, who is now retired, was one of the original founders of the Green Berets. He was part of the team that helped develop the special forces program.

"We were the first," Banta said. "We were the pioneers."

Sex Education Where?

The only people with the money, with the power, and with the knowledge of the facts of life are the adults. This leaves the children in a vulnerable position. They are forced to imitate and follow, and sometimes they are made to feel that it is wrong to question or to disagree with the adults. This can lead to a sense of inferiority and self-doubt. It is important for children to be taught how to make informed decisions and to be able to ask questions and express their thoughts and feelings. This will help them to develop a sense of autonomy and to feel confident in their abilities.

The Spurious Argument

There is nothing wrong with sex education. It is an important part of the education of the young. It helps them to understand their bodies, their emotions, and their relationships. It also helps them to make informed decisions about their sexual orientation and their sexual behavior. It is important for children to be taught how to make informed decisions and to be able to ask questions and express their thoughts and feelings. This will help them to develop a sense of autonomy and to feel confident in their abilities.
