Water Pressure Restored

Ada's Power Still Out

The Oklahoma Journal

Vol. 4, No. 123
7460 S. 15th Street 
(Oct. 30, 1939)

Ada (Oklahoma) - The noon storm in the vicinity of this oil field resulted in a general black-out for about 30 miles radius. Several homes and businesses were without electricity and telephone service.

An early storm warning was issued by the U.S. Weather Bureau, and all Ada residents were advised to prepare for possible power outages.

Almost Gone

A window operable on the Ada-Oklahoma Tenor in downtown Grady County was broken after several weeks of heavy rain. The window was replaced, and the residents are pleased with the repair.

Population To 'Ruin' Earth In 30 Years

The nation's population is increasing at a rate of 3,000 people every day. This is a significant concern for the environment and future generations.

New Theory Of Creation Is Advanced

By Dr. Frederick Freemon

In a new theory of creation, Dr. Freemon proposes that the Earth was formed from a molten rock core that slowly cooled and solidified over millions of years. This theory challenges the traditional view of a young Earth in a stable position.

Wonderland For Some...

But Misery For Others

The first major snowfall of the season overtook the region with a vengeance, leaving many residents and businesses unprepared.

In the midst of the winter weather, many took shelter, but the cold and snow caused significant challenges. For some, it was a test of resilience and determination.

Despite the discomfort, many found a silver lining in the snow, enjoying the beauty of the winter landscape.

For others, the cold and snow posed serious challenges, leading to interruptions in daily activities and increased strain on resources.

The region is poised to face more winter weather, reminding residents of the need for preparedness and adaptability.

Student Loan Outlook Brighter

Back up another selling point for the future of young people who are in college and those who are no longer students:

The outlook for student loans is improving. The U.S. Department of Education recently announced a program that will allow borrowers to refinance their student loans at lower interest rates, providing an opportunity for students and recent graduates to save money on their debt.

The program, called the Federal Student Loan Refinancing Program, was announced in response to concerns about the rising cost of higher education and the burden of student loan debt on young people. The program allows borrowers with outstanding student loans to apply for a new loan at a lower interest rate, which can help reduce their monthly payments and overall debt.

Under the program, borrowers must have a credit score of at least 700 and must be in good standing on their existing loans. They must also meet certain income eligibility requirements, based on their total family income.

The program is available to both private and federal student loan borrowers and is expected to be open for applications in the coming weeks. Interested borrowers should visit the website of the U.S. Department of Education to learn more about the program and to apply.

In 2017, the U.S. Department of Education announced another student loan refinancing program, which provided a similar opportunity for borrowers to refinance their existing loans at lower interest rates. The program helped thousands of borrowers save money on their debt, making it easier for them to manage their finances and plan for their future.

The current program is designed to help borrowers who have already accumulated significant debt and are looking for ways to reduce their monthly payments and overall debt. By providing a lower interest rate, the program can help make student loan debt more manageable and less burdensome for young people.

The program is another example of the government's commitment to supporting students and young people as they pursue higher education and build their futures. By providing access to lower interest rates, the program can help make higher education more affordable and achievable for students and recent graduates.
