Tired Astronauts Rocket Homeward

SPACEx CENTER, Houston (Reuters) - Three tired, but otherwise healthy astronauts crawled out of the space shuttle "Endeavour" on Tuesday morning after the spacecraft had completed its 13th and final voyage into space.

The astronauts, Commander John Young, 48, and mission specialists Robert Crippen, 47, and William Pogue, 41, emerged from the Endeavour's airlock at 10:32 a.m. and descended a ladder to the recovery ship "Hatteras," which had been waiting in the Gulf of Mexico.

"I'm just glad to be down," said Young, who has flown on six NASA missions, including the first manned spaceflight in 1961. "It's been a long trip.

"We're all a little bit tired," Crippen added, "but we're happy to be back on Earth.

Young said the astronauts had been up for about 18 hours before the landing, and that they had been working on experiments related to the space station "Mir".

The landing marked the end of a 15-day mission that was intended to test new techniques for returning to Earth from space.

The Endeavour had been launched from the Kennedy Space Center on April 15, and had traveled to the International Space Station on April 29.

The mission, which was the first to use the new space shuttle "Atlantis," was designed to test new technologies and make repairs to the station.

At one point, the astronauts were forced to work around the clock to repair a damaged solar array.

"It was a tough mission," said Pogue, who had been in space four times before.

"But we did it. We're proud of ourselves.

The astronauts were expected to spend several days on the recovery ship before being flown back to their home bases.

The mission was the last for the Endeavour, which had been in service since 1984.

The spacecraft was scheduled to be retired after the mission, and its parts will be sold for scrap.

The astronauts were expected to spend several days on the recovery ship before being flown back to their home bases.

ATTEND CRUSADE '72

Mrs. Hall To Host Garden Club
Halls To Join Scout 'Float'

Two boys, 11 and 12, have been named to represent the city in the national float competition sponsored by the Boy Scouts of America. The competition, which is held every two years, involves the creation of a float that represents a city or town in the United States. The two boys, who have been selected for the honor, are expected to work with Scout leaders and community members to create a float that will represent the city and its history.

44-Year Employee Of Ford Is Dead

A 44-year employee of Ford Motor Company, who was widely respected for his dedication and hard work, passed away recently. The employee, who joined Ford in 1973, was known for his commitment to quality and his contributions to the company's success. He will be missed by his colleagues and the community.

Ex-Sooner Finds Changes Amazing

Former University of Oklahoma football player has expressed his amazement at the changes he has seen in the football program since his time as a player. The athlete, who played for the Sooner football team from 1980 to 1984, has been impressed with the progress made by the program in terms of facilities, coaching staff, and overall performance.

Cityan’s Complaint Dropped

City council has agreed to drop the complaint filed by a city resident against a local business. The complaint was filed in an effort to address concerns related to the business's operations and compliance with city regulations. After reviewing the evidence and hearing from both parties, council members have decided to drop the complaint.

Judge Delays Gay Lawsuit

A gay rights group has filed a lawsuit against a religious organization for discrimination. The lawsuit, which was filed in a federal court, claims that the organization violated the city's anti-discrimination laws by denying services to a gay couple. The judge has granted a delay in the case, allowing both parties to further investigate the matter and gather additional evidence.

Demo Youths Hail Nomination OK

A group of students has praised the nomination of their school for a prestigious award. The students, who are part of a demonstration program, have expressed their excitement and appreciation for the recognition that their school has received. The nomination is in recognition of the school's innovative teaching methods and positive impact on students.

Ranney Enterprises Change Telephone Number

Ranney Enterprises has announced a change in its telephone number. The new number, which is intended to improve customer service and provide a more efficient way to contact the company, can be reached at 1-800-555-1234. Customers are encouraged to update their contacts and use the new number for all future communications.
Panel Urges CRC Changes

City Commission
Termed 'Tragic'

By John Adams

Panel of the Oklahoma City Commission today called for changes in the CRC (Central Resolution Committee) saying the current system is inefficient and unfair. "The CRC needs to be overhauled," said Commissioner John Adams. "The current system is a mess." Other members of the commission concurred, with Commissioner Jane Smith saying, "We need to get this thing under control." The proposals include making the CRC a bi-weekly meeting and assigning a specific coordinator to handle the workload. The commission hopes these changes will be implemented by the next election cycle.

A Review

Stock Plot Not Bad

By Bob Adams

In today's market, it's important to keep an eye on your investments. Bob Adams, local financial expert, says that stocks are looking good right now. "The market is up, and we're seeing some strong gains," he said. "However, it's important to remember to diversify your investments." Adams recommends looking into blue chip stocks and tech companies for a solid return on your investment. He also suggests keeping an eye on the international markets, as they can provide additional opportunities.

New FBI Agent

Coming To City

Several new FBI agents are set to arrive in Oklahoma City in the near future. The agents will be part of a new initiative to increase the FBI's presence in the city. "We're excited to have these new agents," said FBI Director Robert Mueller. "They will be a valuable asset to our team." The agents will be working on a variety of cases, including terrorism, cybercrime, and money laundering. They will also be involved in community outreach, working to build relationships with local law enforcement agencies.

Hazes, Boos, Appropriate

"I'm new here, and I'm just getting used to the pace," said one new agent. "It's a big city, and there's a lot going on." The agents are expected to be fully integrated into the local community within the next few months. They will be working out of a new office building in downtown Oklahoma City, which was recently renovated. The building is expected to house the FBI's new Oklahoma City office.

Last year, 1,900,000 drivers got the message. The hard way.

They tailgated the car in front of them. And killed or injured 245,000 people.

They gave too much warning, they got too close to someone else's car. And they hit the brakes too late. We know, they didn't have time to do anything else.

You can't tailgate. It's the most dangerous thing you can do while driving.

Because it's too late. When you're too close to the car in front of you, it's too late to stop.

Tailgaters know exactly what they're doing. They should also know that they aren't going to get away with it. And they may never get away at all.

In one in a series presented by N.A.D.A., the Oklahoma Journal, and the new car dealers of our community.

Your new car dealer reminds you that if you drive safely, you'll save money. And if you drive dangerously, you'll save lives.
