**Tip Sparks Search For Bride’s Body**

By LARRY CANNON

More than a dozen letters on Tuesday were delivered to the Oklahoma County Sheriff's Office, bringing the case of a missing bride to an end. The body was found in a ditch near the town of Chickasha.

The search was started after an unsigned letter was re-
éceived by the Oklahoma County Sheriff's Office. The letter, dated May 20, 1991, contained information that led investigators to believe the bride's body may be in a ditch near the town of Chickasha.

The search was conducted by a team of officers, including the Oklahoma County Sheriff and the Chickasha Police Department. The body was found in a ditch near the town of Chickasha, and an investigation is underway to determine the circumstances surrounding the death.

Bellmunt Hits Energy Crisis

WASHINGTON (UPI) — The United States has cut its energy crisis by 40%, according to a new report by the Department of Energy. The report, which was released today, says that the country's energy crisis is now under control and that the US is on track to meet its energy needs next year.

The report also notes that the country's energy crisis has been exacerbated by the ongoing energy crisis, which has led to a sharp increase in the price of oil. The report says that the government has taken action to address the crisis, including increasing the production of oil and natural gas.

The report concludes that the US is on track to meet its energy needs next year, provided that there are no unforeseen events that could cause a disruption in the country's energy supply.
