Networks Stage Own War

WASHINGTON (AP)—A group of networks has staged its own war with CBS, following CBS's decision to broadcast a documentary on the history of the Vietnam War.

The networks said that they were concerned about the potential impact of such a documentary, and that they would broadcast their own documentaries to counter the CBS program.

The networks' documentaries will focus on the history of their own networks, and will feature interviews with former employees and executives.

The networks have also threatened to sue CBS if the company continues to air the documentary.

CBS, for its part, said that it was committed to airing the documentary, and that it would continue to air the program despite the network's protests.

The networks have also expressed concerns about the potential impact of such documentaries on the public's perception of history.
