3 Prisoners Released To Peace Group

TOKYO (UPI) — North Vietnam released three American prisoners of war in a U.S. peace group delegation's visit to Hanoi, an official source said. The North Vietnamese news agency, the VGP, said the three were handed over after a brief ceremony.

All three American fliers, dressed in colorful tunics and cigarettes, lit up as they greeted the peace group. They were the first prisoners of war to be released after the recent Geneva conference, for their human rights treaty and the agreement on a cease-fire in the Tropic War.

VGP said that after the ceremony, the three released pilots, their families and the members of the peace group, flew to the United Nations, where they would meet with the United Nations' representatives and discuss the issue of prisoners of war.

Pullout Suffers Attack

The United Nations Security Council has condemned and condemned Israel's military action in Lebanon. Israel responded with a surprise attack on a UN command post, killing three UN peacekeepers and injuring others.

The attack comes just days after Israeli forces withdrew from southern Lebanon, ending a 22-year occupation. The UN peacekeepers in the area had been working to ensure the safe withdrawal of the Israeli forces.

The UN Security Council condemned the attack and called for an immediate ceasefire. The council also said it would consider taking further steps if Israeli aggression continued.

Power Rates On Increase

WASHINGTON — The average electric bill for a home in the United States is expected to increase by 6.5% in the next 12 months, according to the Federal Energy Regulatory Commission.

The increase is due to rising costs for natural gas and coal, which are major components of the average electric bill. The commission said the increase will affect both residential and commercial customers.

The commission also said that the increase is being driven by higher costs for natural gas, which is used to generate electricity.

The commission noted that the increase is in line with projections made last year, when it said that the average electric bill would increase by 6.0% in 2014.
