OU Asks State Regents To Discuss Law Funds

The University of Oklahoma Board of Regents formally asked the Oklahoma State Board of Regents on Sept. 19, 1973, to consider legislation that would provide the OU with an annual appropriation from the state's general fund to cover current expenses.

The request was made by OU President David Boren, who said the university has been in a "financial bind" since the budget crisis that began in 1971. Boren said the legislation was necessary because current state financial aid to the university has been inadequate to meet the needs of the institution.

In addition to the annual appropriation, Boren requested that the state consider providing OU with additional financial assistance to help cover the cost of education for students who are unable to pay tuition.

The request was in response to a news report that the state is considering reducing the amount of financial aid it provides to OU and other state universities. Boren said the reduction would be detrimental to the university and students, and would result in higher tuition costs for students.

The state board of regents is scheduled to consider the request at its next meeting, which is expected to take place in October.
