Officials Suspended
Tinker Union Investigated

By ROBERT TENTHORP

The Journal Staff

Several officials of the 780-member Tinker Air Force Union were arrested yesterday and the entire base personnel was placed under nationwide confinement in the name of "public safety."

The investigation began at 8 a.m. when a group of union leaders were arrested outside a store in Oklahoma City. The leaders included the union's president, secretary, and treasurer.

An official of the union said the leaders were arrested for refusing to turn over their union funds to the government. The union has been involved in a long-running dispute with the government over the use of union funds.

Rerouting To Ease Congestion

State Highway 71 will be rerouted and a new highway, State Highway 71-75, will be constructed through the area. The new highway will be built in two phases. Phase one will be completed in the next six months and phase two in the next two years.

Take CPI With Grain Of Salt

According to the April 1975 CPI report, the cost of living has increased 6.4% since 1970. However, the report also shows that the CPI is not a reliable indicator of the true cost of living because it does not take into account changes in the quality of goods and services.

Conversely, in a study by the Bureau of Economic Analysis, it was found that the CPI overestimates the rate of inflation because it does not account for improvements in the quality of goods over time.

Don't Spare That Tree

The Environmental Protection Agency is proposing a new regulation that would require companies to reduce their emissions of greenhouse gases by 15% by 2010. This regulation is part of the agency's efforts to combat climate change.

State Editors Say

Crime:

New York City has seen a decrease in crime rates over the past year, with a decrease of 7% in violent crimes and 5% in property crimes. This is attributed to increased police presence and community involvement in safety efforts.

Wreck Data Needed

The Oklahoma Journal is calling for the state to require the collection of data on the causes of car accidents. This information could help to identify areas where improvements can be made to prevent accidents.

Truman Talks With Doctors

KANSAS CITY, Mo. — Former President Harry S. Truman, who retired Wednesday at 78, is in a hospital bed with what the doctors are calling a "healed stroke." He is in a private room in the hospital's 10-story building and has not left his bed since he was admitted Monday, a hospital official said.

Truman's wife, Bess, and daughter Margaret are with him. Hospital officials said the former president was in stable condition.

The 84-year-old Truman was born in Independence, Mo., in 1884. He served two terms as the 33rd president of the United States.

Butz Urges 'Hands Off' Farm Policy

The Los Angeles Times

LOS ANGELES — Secretary of Agriculture Earl L. Butz said here Monday the time has come to start dismantling all federal government controls over the country's farming and ranching operations.

"The only way to get our food consumers and our farmers to get back on their feet is to get government out of agriculture," he said.

In remarks made before an audience at the American Farm Bureau Federation — where he later received the group's distinguished service award for his contributions to agriculture — he said:

"I was on a diet from the 8th till the 14th this year from the U. S. Treasury giving farmers for doing or not doing anything. The Treasury was to be a social worker a social director in every town and village, the farmer had to become more motivated and less materialistic or social interests."

Butz said the market — not urban conglomerates who want a 'cheap food policy' — should control prices for agricultural products.

The average size of land the present situation contains would be comparable to the average family farm, which is 40 acres, and that is about what every farmer should have.

Butz also said he will "categorically oppose price supports in agriculture."

Butz said it was time to take the farm bills off the table for the next Congress.

"It is time we moved to the next step in agriculture," he said. "We are moving to a situation where the farmer will be able to get his output to market and get a fair price for it."
