Lea-Fee Gas Deadline Set

WASHINGTON D.C. — The Department of Health, Education and Welfare and the Federal Trade Commission have set a December 26 deadline for the sale of lead-free gasoline. A federal court order requires that all gasoline sold after January 1, 1974, contain no lead.

Now, interested groups will have 180 days to comment on the proposal, after which the EPA will make its decision. The proposal will also affect the use of lead in manufacturing products, including such items as toothpaste, paint, and leaded glass.

Busing Resolution Proposed

A busing resolution was proposed yesterday in the U.S. Congress to end the practice of busing children to integrate schools. The resolution, introduced by Rep. Charles B. Rangel (D-N.Y.), would allow states to opt out of the program if they can demonstrate that their schools are already integrated.

Travelers Re-discover Greece, Greek Cuisine...

Honeyed Desserts From Aegean Seas Add Taste To Holidays

ELIZABETH HOAG

As the year draws to a close, travelers to the Mediterranean are discovering the exotic delights of the Greek Isles. The honeyed desserts that have made their way from the Aegean Sea to the shores of the Mediterranean offer a sweet and fragrant taste of Greece.

Honey, a natural product of Greece, is used in these desserts to create a rich, caramelized flavor. The use of honey in Greek cuisine is not only for sweetness, but also for its health benefits. Honey is known to have antibacterial properties, making it a natural preservative for these desserts.

The desserts are typically served at the end of a meal, often as a complement to coffee or tea. They are often made with ingredients that are locally sourced, such as almonds, walnuts, and hazelnuts, which are plentiful in the region.

These desserts are not just for the eyes, but also for the palate. The flavors are delicate and complex, with the sweetness of honey complementing the earthy tones of the nuts. They are a perfect way to end a meal, leaving a lasting impression.

As the year draws to a close, these desserts offer a taste of Greece, a land steeped in history and culture. They are a reminder of the beauty and allure of the Mediterranean, and a testament to the rich culinary heritage of Greece.

'R' For Reading Wins Educators' Top Billing

By RAY WILSON

There's always room for improvement on the reading list at Oklahoma State University. Actually, there's plenty of room for improvement in the reading habits of many students. The American Library Association has just released a report stating that only a small percentage of students at colleges and universities in the United States are reading books regularly. In fact, only about 15% of college students read books regularly. The report also states that many students are turning to electronic devices for their reading materials. This is a concern because it is argued that reading books is a better way to learn and retain information. Some educators believe that reading books is a crucial part of developing critical thinking skills. They argue that reading books is a valuable way to improve one's vocabulary, comprehension, and analytical thinking. Therefore, it is important for students to make reading books a priority in their lives.

Travelers Re-discover Greece, Greek Cuisine...
Honeyed Desserts From Aegean Seas Add Taste To Holidays

Elegant and less elegant versions of traditional Greek desserts are being enjoyed by a new generation of travelers.

Traditional Greek desserts are not as well known as their European counterparts. However, they offer a delightful taste of the Mediterranean.
