South Vietnam Abandons Qui Nhon

There is serious concern as to whether the South Vietnamese will effectively carry out the Pentagon's plan to strengthen the defenses of three key cities: Saigon, Vung Tau and Qui Nhon. The concern is based on reports of considerable intelligence information which indicates that the defoliators are very active in the area.

The military followed up reports that four Viet Minh divisions were reported to be on their way to Saigon. The reports were said to be based on intelligence reports from the Saigon Police Department.

Striped Of Life Savings

Every man tells a story... and the story of the man who was striped of life savings is a cautionary tale. He was a man who lived a modest life, but who was not content with what he had. He sought adventure, and took risks, and paid the price.

The man, who was a local celebrity, was betrayed by his business partner. The partner, who was a con artist, took advantage of the man's trust and stole his life savings.

The man, who was devastated by his loss, decided to write about his experience to warn others of the dangers of trusting too much.

He has written a book, which is available on Amazon, and is giving a portion of the proceeds to a charity for victims of financial fraud.

The book, which is titled "The Striped Man," is available on Amazon and is available for $9.99.

The man, who is an avid reader, is looking forward to your comments on his book.

Sincerely,

Bill Thorp

City Crime Up 20%

Oklahoma City's 1974 crime rate jumped almost 17% over the 1973 rate. This is the first time in 10 years that the crime rate in the city has shown such a substantial increase. The jump in crime is due to a number of factors, including increased drug activity, economic downturn, and a decrease in police manpower. The city is now considering increased police patrols and the implementation of new crime prevention programs in order to combat this rise in crime.

Phillips Says 'Deep Well' Sunk In Utah

ROBERT P. PHILLIPS, Phillips Petroleum Co., said that his company has begun drilling a "deep well" to explore for petroleum resources in Utah.

Robert Wright, a Phillips spokesman, said that the drilling is part of a program to determine whether the area contains enough petroleum to be worth further exploration. He said that the company has drilled several test wells in the area, and the "deep well" is part of that program.

Some residents of the area have expressed concern about the drilling, fearing it could affect groundwater supplies. Phillips has assured them that the drilling will not affect the water supply and that the company will take all necessary precautions to ensure the safety of the operation.
