How To Keep Dahlias Happy

By ALICE WISEBANK
The Washington Post News Service

Dahlias are easy to grow, but they do require some effort and attention. Here are some tips to keep your dahlias healthy and beautiful.

Keep Them Watered
Dahlias need plenty of water to thrive. Water them regularly, especially during hot weather. Make sure the soil is consistently moist but not waterlogged.

Mulch
Adding a layer of mulch around the base of your dahlias can help retain moisture and suppress weeds. Use organic mulch to provide additional nutrients to the soil.

Prune
Regular pruning can help increase the number of blooms and improve the overall health of your dahlias. Remove dead or damaged stems to encourage new growth.

Fertilize
Dahlias require a steady supply of nutrients. Fertilize your plants every 4-6 weeks with a balanced fertilizer to promote healthy growth.

Pests and Diseases
Keep an eye out for common pests and diseases that can affect dahlias, such as aphids, powdery mildew, and rust. Treat them promptly with appropriate pesticides or fungicides.

Teen Identified As Tulsa Stab Victim

A 14-year-old girl named Emily Burns was identified as the stabbing victim. She was attended to by paramedics and then flown by helicopter to the hospital. Her condition was critical upon arrival. The incident occurred near a school as she was walking home from a friend's house.

The Tulsa Police Department is investigating the incident. No information on the suspect or motive has been released at this time.
