Some Officers Critical
Police Dispatchers Go Civilian

By STEVE HOTTMAN
Of The Oklahoman

Oklahoma City Police Department’s Commu-
nication and Information Systems Unit becom-
e more important in recent years, and new ap-
proaches to the job of dispatch are necessary.

Critics of the system suggest that the current
process is too slow and inefficient, and they
want a more streamlined system.

Others argue that the current system is ade-
quately working and that changes would only
make things worse.

Korklak said he favors changes, but he is
concerned about the department’s responsibility
to the public safety.

Korklak said the main problem with the dis-
patcher role is the lack of a clear definition of
responsibility.

Some of the line dispatchers on the job have
seen a decline in the number of reports they
have been handling for the last few months.

"We’re just not sure if they’re using it to its
full potential," Korklak said. "They might be
just asking questions because they’re not sure
what it can do.

Korklak said the department is making every
effort to improve the system and that more
changes are on the way.

African-American, Ford Aim At Peace

SALEMUNG, Arizona (AP) — President Ford
and Prime Minister Begin of Jordan met to dis-
cuss ways to make peace in the Middle East.

A Jordanian diplomat said Begin was down to
decide on how to do it.

"Begin is ready to make peace if the US presi-

dent can make an offer to the Israeli people," the
diplomat said.

Israel and Jordan have been at war since 1967.

Ford Takes Tumble

GRAND JUNCTION, Colo. (AP) — President
Ford, who has been spending a lot of time in
Colorado, took a tumble on Monday when he
fell backward while playing a game of frisbee.

Ford’s fall was not serious, but it did cause
him to miss some of the fun.

The Oklahoma City News reports that oil
capizes were just found in the Gulf of Mexico.

Six crewmen were also reported missing.

Storm Cell Produces Two Funnel Funnel NeAR Porca COna

Scattered showers and thunderstorms hit north central
and southwestern Oklahoma on Wednesday and Thursday.

The storms moved slowly but were accompanied by
hail and lightning. Several areas were affected by
severe weather, including the Oklahoma City area.

The storms resulted in widespread power outages and
road closures. Some areas were even flooded by
rainwater.

The Oklahoma City News reports that the storms
caused an estimated $1 million in damage.

The storm was reported to be the most powerful
in recent memory and caused widespread damage.

Storm Lab Flies Plane To Aid Twister Study

NORTHERN WASHINGTON, Wash. - The National Science Foundation's new 18,000-foot high research plane has been sent here to study tornadoes, the nation's most violent storms.

The plane, called the Stratocruiser, is equipped with high-speed television cameras, infrared scanners, and other instruments to measure the power and movement of tornadoes. Its data will be used to improve weather forecasting and help prevent future storms.

Sex Bias In Credit Left Up To Board

WASHINGTON (AP) - Sex bias in credit policies is left up to the board of directors of banks, a Justice Department official said yesterday.

In testimony before the Senate Banking Committee, Assistant Attorney General Melvin W. Belli said there is no evidence that sex discrimination is widespread in the banking industry.

He added that if credit policies are not fair to both men and women, the matter should be brought to the attention of the board of directors.

Jobless Rate For Black Teens Rising

WASHINGTON (AP) - The jobless rate for black teenagers in the U.S. is rising, according to a report by the National Urban League.

The report, released yesterday, found that the unemployment rate for black teenagers ages 16 to 19 increased from 15.7 percent in 1973 to 18.4 percent in 1974.

Irwin Sets Atlanta Mark

Pippin Photo Service

27 Years in Oklahoma City

Irwin was on fire against St. Louis, hitting .433 with 2 home runs and 9 RBIs in the series. The Atlanta Braves’ outfielder has been nothing short of spectacular in his first full season, hitting .323 with 31 home runs and 94 RBIs. The left-handed hitter has been dominant against right-handed pitchers, hitting .350 with 19 home runs and 60 RBIs.

The Pirates’ offense was unable to keep up with Irwin’s offensive prowess. The Pirates’ hitting struggled throughout the series, hitting only .226 with 13 runs scored, 21 hits, and 1 home run. The Pirates’ offense was unable to get anything going against Irwin, who shut them out in two of the three games.

The series also marked the end of the Pirates’ season. The Pirates finished the season with a record of 88-74, good for third place in the National League. The Pirates were eliminated from playoff contention on the final day of the season, falling to the St. Louis Cardinals in the first round of the playoffs.

8 Tests Measure Fitness

Reporter Flunks OSU Physical Evaluation

By STEVE HOFFMAN

Oklahoma State University Police held a physical evaluation day for the news media, I attended.

Dr. A. B. Harrison, director of OSU's new Physical Education Center, told us, "Plyometrics, body fat, and agility tests are used to evaluate physical fitness." He explained that the test results would be "of interest to everyone." Harrison said, "It's a good opportunity to see how our students perform in these areas." He also mentioned that the test results would be used to develop future physical education programs.

Players were asked to test their plyometric abilities by standing on a board and jumping repeatedly. The number of successful jumps was recorded.

Body fat percent was determined by measuring the circumference of various body parts. Harrison explained that a higher percentage of body fat is correlated with a lower level of fitness.

Agility was measured by performing a series of obstacles, such as running a straight line and backtracking.

The test results were compared to national standards to determine each person's physical fitness level.
