3 Surrender After Police Won't Yield

By MIKE BRAKE

A three-man Oklahoma City police squad on Friday morning killed three of a white supremacist group that had been terrorizing neighborhoods for the past 10 years. The group, known as the KKK, was arrested and charged with murder.

The KKK was formed in 1915 to promote segregation and white supremacy. They have been responsible for many acts of violence and terrorism throughout the years, including lynchings and the burning of crosses.

In 2019, the KKK was arrested for planning to terrorize a predominantly black neighborhood in Oklahoma City. They had set up a campsite in the neighborhood and were planning to set fire to homes.

The police arrived on the scene and found the KKK members armed with guns and explosives. They were arrested and charged with terrorism.

The Oklahoma City police have been working to stop the KKK for many years. They have arrested several members in the past and have been successful in preventing many of their plans.

In conclusion, the police have put an end to the KKK's activities in Oklahoma City. They have arrested several members and have prevented many of their plans. We hope to see a better tomorrow without the KKK.

Capitan Shuns Hero's Role

By MIKE BRAKE

In an emotional speech before an applauding audience on Friday, Oklahoma City Police Chief Don Johnson announced that he would be retiring at the end of the month.

Johnson, who has served the city for 33 years, was praised for his leadership during the Oklahoma City bombing.

"I am honored to have served this city and its citizens," Johnson said. "I am ready to move on to new challenges."
Cherokees To Vote On New Tribal Chief

America's Christmas was in trouble. With the tornadoes and floods and storms, the Coal and Dartmouth mining company had been forced to shut down operations. The Cherokees were in dire need of leadership. Enter John White, the new tribal chief. He promised to bring stability and prosperity to the Cherokees.

Contract

The contract was signed and sealed. John White would lead the Cherokees to victory. But the road would not be easy. With the coal industry in shambles, White would have to find a way to revitalize the economy. It was a tall order, but he was determined to see it through.

Tornado Formation Studied

The national weather service in Kansas City studied tornado formation for the first time in the history of such studies. The research team found that tornadoes form when a jet stream moves over a region, creating a low pressure area. They also discovered that tornadoes are more likely to occur during the spring and summer months.

Female Military Policeman Jolts National Guard Camp

By Nancy Adams

When the first female police officer was taken on duty at Camp Peterson, she was met with a lot of resistance. "I was the only woman in the room," she said. "It was a bit intimidating at first, but I quickly got used to it."

The officer, who requested anonymity, said she was assigned to the base's security office. "I was originally going to work as a traffic officer, but they needed someone in security," she said. "I thought it would be a good challenge, and I was right."

The officer said she had been trained as a police officer in her home state before being deployed. "I have a lot of experience, and I was ready for this," she said. "I think it's important to have women in all aspects of law enforcement."

The officer said she had received a lot of support from her colleagues. "They have been great," she said. "I have learned a lot from them, and I have been able to contribute to the team."

The officer said she hoped to continue her work at Camp Peterson for the remainder of her deployment. "I love my job," she said. "It's a great feeling to know that I am making a difference."

Clearing Up The Fine Print

Customer complaints about the high cost of advertising and shoreline pollution are nothing to joke about.

Some people seem to think that because it's "fine print" it's not important. But the "fine print" of any contract is just as important as the rest of the agreement.

Vintage prints, like those of the 18th century, are valuable collectibles. But the "fine print" of those contracts is just as important to the parties involved.

The "fine print" of a contract is a legal document that spells out the terms and conditions of the agreement. It's important to read it carefully and understand what it means.

The Institute of Legal Economics has published a book titled "The Fine Print: What It Means and How to Use It." It's available at most bookstores, or you can order it directly from the Institute.

Hope For Housing

The rush to build more homes has increased the demand for housing, and the cost of housing has also increased. However, we need to be careful not to ignore the importance of housing as a basic need.

The recent increase in housing prices has been a concern for many people, but it's important to remember that the cost of housing is not the only factor to consider.

The government has taken steps to address the housing crisis, but more needs to be done. We need to ensure that everyone has access to safe and affordable housing.

The Institute of Urban Economics has published a report titled "Housing in America: A Time of Crisis." It's available at most bookstores, or you can order it directly from the Institute.
