Draft Office Closing Down

Why is Tareyton better?

Charcoal is why. Charcoal filtration is used to freshen air, to make water and other beverages taste better. But charcoal doesn't do more than balance—gives you a taste of what plain white filter can't detect.

Cigarettes have been made by the Tareyton to be a better choice. The Tareyton has two filters—a white tip on the outside, activated carbon on the inside. Like other filters they reduce tar and nicotine. But the charcoal does more. It balances—gives you a taste of what plain white filter can't detect.
