**Terrorism In Spain**

The latest move in a series of actions which are bringing the situation in Spain to a critical state is the taking of an American hostage. The report that the terrorists are demanding the release of convicted Spaniards as a condition for releasing the hostage is of grave concern. The United States has a policy of not negotiating with terrorists, but this case is different. The hostage is a citizen of the United States and his safety is in the hands of the terrorists. The international community must take a strong stand against this terrorism and work towards a peaceful resolution of the situation.

The people of Spain are suffering under the weight of violence and terrorism. The government must take decisive action to protect its citizens and ensure the safety of all. The United States must also support the efforts of the Spanish government in this difficult time.

**Why is Tareyton better?**

Charcoal is why. Charcoal filtration is used to freshen air, make water and other beverages taste better. It does something for cigarette smoke, too.

TAREYTON has two filters: a white tip on the outside, activated charcoal on the inside. Like other filters they reduce tar and nicotine. But the charcoal does more. It balances, smooths--gives you a taste no plain Ninth can match.
