It May Be A White Christmas - 3 To 6 Inches Due

HEAVY SNOWS FORECAST

By ARNOLD HARRISON

The Oklahoma Journal

A heavy snow warning was issued today by the National Weather Service in Oklahoma City, predicting up to 3 to 6 inches of snowfall across much of the state.

"There is a high pressure system moving in from the north, which will bring a cold front through the area," said meteorologist John Smith. "This will result in a period of steady snowfall starting later today and continuing into early tomorrow morning.")

A snowfall of this magnitude could cause widespread closures and delays, so officials are urging motorists to take caution.

"We encourage everyone to plan for travel and be prepared," said Oklahoma Transportation Commission Chair John Brown. "This snowfall will make roads slippery and visibility reduced, so please drive carefully and allow extra time for travel."}
