Legislators Endorse $20 Million Tax Cut

By Kay McCarthy

Oklahoma City — House Speaker Don Deal and Senate Majority Leader Pete Kiger said they were in favor of the proposal to provide $20 million in tax relief to Oklahomans with the return of unused utility bills from the utilities, including telephone and gas, to the state's general revenue fund.

The tax relief would come about through a process outlined in the utility bill's language, which would allow the state to receive the tax credits from the utilities, which are currently unused. The money would then be distributed to the state's general revenue fund, which would allow for the reduction of the state income tax.

"We feel in the House like we can responsibly reduce the state income tax and still bring in the money to help fund the state's general revenue fund," Deal said. "We want to make sure the money goes back to the people who need it the most, and we believe the tax relief will help achieve that goal."
