Reagan Blasts Moves

By United Press International

Washington (UPI) — President Reagan fired shots at the Carter administration today in a heated speech where he accused the president of doing a "very bad job" by reacting to a 1979 oil embargo from the Organization of Petroleum Exporting Countries (OPEC).

The president, who delivered the speech from the Rose Garden of the White House, said the government had reacted slowly to the rise in oil prices and did not respond fast enough to the embargo.

He added that the administration had failed to present a plan to the public that would help alleviate the situation and that the administration was too "fatally" slow to react to the crisis.

"The government is not prepared," Reagan said. "It has not presented a plan that would offer hope to the American people for some kind of response to the problem."

"We have a situation where there are more problems than there are solutions," he continued. "And until we find a way to solve these problems, the American people will continue to suffer."
Day Of Shame

As the price hike takes center stage, the day of shame is not far away. The price hike reached a new peak with the increase in gas prices. The gas stations are crowded with people trying to fill their tanks. The increase in prices has left many drivers feeling frustrated and upset. The situation is getting worse with each passing day.

Home At Last

Stocks Fall Sharply

NEW YORK (AP) - A broad-based Wall Street sell-off pushed the Dow Jones average of 30 industrials 15.79 points lower to a close of 768.34. The blue-chip index ended the week with a loss of 29.26 points over its close on Friday, and Monday's session opened 5.84 below the Dow's close on Friday. The Standard & Poor's 500-stock index plunged 26.13 points to 281.99, ending a 2.1% loss in a week. Brokers and money managers said they were concerned about rising interest rates, which could harm profits for companies that have borrowed heavily to finance operations. The Averaging Stock Exchange's Composite Index, which includes small and midsize companies, fell 7.63 points to 136.54. The index was off 5.82 points for the week, the biggest weekly loss since the start of 1980. A sell-off in the bond market contributed to the decline. 

Terrorists Arraigned

A four-man group connected to a radical Palestinian organization was arraigned in Federal court here today on charges of conspiring to transport explosives into the United States for terrorist attacks. The group was arrested last week after the New York State police discovered a large cache of ammunition, including 150 pounds of high explosive, 500 pounds of lighter fluid, and a quantity of matches in a storage facility in the Bronx. The police also seized a truck and a car used to transport the weapons. The group was founded by Sheik Yassin, a leader of the Palestine Liberation Organization, and has been involved in a series of bombings and assassinations in the Middle East. They have been implicated in the assassination of several prominent political figures, including Abu Nidal, a former PLO leader. The group's tactics have been condemned by both the United States and Israel, which have called for its disbanding. The four men were arrested as they attempted to enter the United States with the weapons and were charged with conspiracy to commit murder, assault, and destruction of property.
