KILLER HEAT WAVE CLAIMS 3 MORE

By United Press International
June 12, 1973

By United Press International from Europe

Three people were killed and an estimated 3,000 others were hospitalized in Europe on Wednesday as the first heat wave in two years swept the continent.

The deaths, the worst since 1949, were reported in Italy, Germany and France. All three victims were over 70 years old.

In Italy, three elderly people died in Rome, where temperatures reached 45 degrees Celsius (113 degrees Fahrenheit).

In Germany, a 78-year-old woman died in the city of Bremen, where temperatures exceeded 40 degrees Celsius (104 degrees Fahrenheit).

In France, two elderly men died in Paris, where temperatures hit 41 degrees Celsius (106 degrees Fahrenheit).

The heat wave, which is expected to last for several more days, has already caused widespread discomfort and health problems, especially among the elderly and those with heart or respiratory conditions.

The government in each country has issued warnings and advised citizens to stay indoors during the hottest parts of the day.

Additionally, the heat wave has caused widespread power outages, with many regions experiencing rolling blackouts.

The cause of the heat wave is a high-pressure system that has been building over the Mediterranean Sea, causing warm, dry air to move northward into Europe.

This phenomenon, known as a heat dome, is often associated with extreme heat and high temperatures, especially in areas that are not typically characterized by such conditions.

The United Nations' World Health Organization has issued an alert, urging countries to take precautions to protect vulnerable populations, such as the elderly, children, and those with pre-existing health conditions.

In response, many governments have activated emergency response plans, including increasing hospital admissions for heat-related illnesses and providing water and cooling centers for the public.

Meanwhile, meteorologists are monitoring the situation closely, with some predicting the heat wave could persist for several more days, potentially leading to further health and economic impacts.

The implications of such a prolonged heat wave are significant, as it could strain healthcare systems, exacerbate air pollution, and have far-reaching economic consequences, particularly in regions that are not well-equipped to handle extreme heat events.

Addressing the heat wave requires a multidisciplinary approach, involving public health officials, meteorologists, and policymakers to mitigate the impacts and ensure the well-being of the population.

The situation underscores the need for ongoing investment in climate resilience strategies, early warning systems, and equitable access to cooling resources, to better prepare for and respond to such extreme weather events.

As the heat wave continues to affect Europe, it serves as a stark reminder of the urgent need for global action to address climate change and reduce the frequency and severity of such extreme weather events.

The world must redouble efforts to mitigate greenhouse gas emissions, enhance preparedness and response capabilities, and support vulnerable communities in adapting to the adverse impacts of climate change.

In addition to the human toll, the economic impacts of such events, including lost productivity, increased healthcare costs, and damage to infrastructure and agriculture, are far-reaching.

Thus, it is imperative that policymakers, public health experts, and the general public work together to address the complex challenges posed by extreme heat waves and other climate-related hazards.

This requires a comprehensive approach that integrates scientific research, policy development, and community engagement to ensure effective and equitable solutions.

As we continue to monitor and respond to the unfolding heat wave, it is clear that adapting to climate change is not just a matter of public health but a matter of national and global security.

It is time for bold action, with a focus on equitable and sustainable solutions, to protect the most vulnerable populations and build a more resilient future for all.

In conclusion, while the immediate focus is on mitigating the impacts of the current heat wave, it is also essential to learn from this experience and prioritize long-term strategies to reduce vulnerability and build resilience against future extreme weather events.

As we navigate this complex challenge, it is crucial to foster interdisciplinary collaboration, harness the latest scientific insights, and engage all stakeholders—government, industry, academia, and civil society—to chart a path toward a more sustainable and equitable future.

In the face of climate change, we must act with urgency and determination, recognizing that every action we take today will shape the world our children inherit.

Let us come together in solidarity, with a shared sense of responsibility, to overcome this challenge and create a better, more resilient world for all.

The global community has the power to adapt to and mitigate the impacts of climate change, but it requires bold leadership, collective action, and a commitment to the well-being of our planet and its people.

As we face the heat wave, let us also reflect on the broader implications of climate change and the urgent need for systemic change to ensure a sustainable and equitable future for generations to come.

In this critical moment, let us reaffirm our commitment to the principles of equity, justice, and resilience, and work together to build a world that is more resilient, equitable, and sustainable.

The heat wave serves as a stark reminder of the challenges we face and the urgent need for collective action.

As we work to overcome this current crisis, let us also look ahead and envision a world where climate change is no longer a threat, but a chance to create a more just, equitable, and sustainable future for all.

The heat wave is a call to action, urging us to act with purpose and determination, to adapt and to learn, to prepare and to respond, to innovate and to collaborate.

Let us seize this moment as an opportunity to accelerate our transition to a more resilient and equitable world, where all can thrive in a climate of change.
News In Brief

New Crime Code Approved
WASHINGTON (AP) -- The House approved legislation on Thursday that would make it easier for police and prosecutors to charge nongovernment officials with computer-related crimes.

Draft Resist Coming
WASHINGTON (AP) -- The Senate voted Thursday to approve a bill that would make it easier for drafted men to resist conscription, if they believe the war is unjust.

Era Biotic Charge Denied
SPOKANE (AP) -- A new era of environmental protection, following the debate over the era, was denied when the Senate rejected a bill that would have imposed a $500,000 fine on companies that fail to meet environmental standards.

Iraq P.M. Two Weeks
By United Press International
The Iraqi prime minister on Thursday announced that he would be leaving the country for two weeks to attend a conference in France.

Reagan Funds Challenged
WASHINGTON (AP) -- President Reagan has resisted efforts of Congress to cut funds on several projects, including a $50 million project to build a new airport in California.

Soviet Proliferation Rejected
BOSTON (AP) -- The Senate on Thursday rejected a bill that would have increased funding for the Soviet proliferation program.

Brown Warns Of Neutralization
PASADENA (AP) -- Schubert was asked why he did not bring a neutralizing agent to the party, but he said he was afraid it would be found.

Arms Buy Bill Approved
WASHINGTON (AP) -- The Senate approved legislation that would allow the purchase of arms by American citizens, a move that would take effect on December 31, 2023.

Candidacy Set
BOSTON (AP) -- Linda, a candidate for the state Senate, has announced her candidacy for the seat vacated by her predecessor, who retired.

Appended is a list of updates and updates of updates, with updates of updates of updates, and updates of updates of updates.
Sisters: Like Playing House With Real Dolls

Maryellen, 32, was reported to have been planning a trip to New York City for the past two weeks, but her plans were suddenly altered when she was found dead in her apartment. The cause of death was determined to be a heart attack. She had been living alone for the past five years, and her friends said she was devastated by the loss of her twin sister, who had died in a car accident several months ago.

Study Sees Rollover Problem With 4-Wheel Drive Vehicles

WASHINGTON (AP) - A Senate task force has concluded that the nation's 4-wheel drive vehicles may be more likely to roll over than other cars, and that the problem is worse than previously thought.

The task force, which was created by the Senate Environment Committee, said that 4-wheel drive vehicles are more likely to roll over when they are braking hard or entering a turn, and that the problem is particularly common in high-speed, dry conditions.

The task force recommended that manufacturers improve the design of 4-wheel drive vehicles to make them less likely to roll over, and that drivers be educated on how to avoid the problem.

Capital Flecked With Sculptures

WASHINGTON (AP) - The nation's capital is being transformed into a giant sculpture park, with more than 1,000 pieces of art on display in public spaces.

The sculptures, which range from small sculptures to large installations, are being installed in parks, museums, and other public spaces throughout the city.

The project is being led by the National Sculpture Society, which is working with local artists and community groups to create a diverse collection of works.

TV TODAY

CBS Shows Place 3-2-4

The three major networks have been in a ratings battle for years, with CBS usually coming out on top.

However, this year has been abnormally competitive, with all three networks seeing their ratings increase.

Sears Plans New Store

CHICAGO (AP) - Sears, Roebuck and Co. said Wednesday that it plans to open a new store in Chicago, marking the retailer's first new location in the city in more than a decade.

The store, which will be located on the city's north side, will feature a new design and will offer a range of products, including clothing, electronics, and home goods.

Murder Charges Filed

OKLAHOMA CITY (AP) - A man was charged with murder on Wednesday in the death of a woman, according to a report.

The man, who is in custody, is believed to have killed the woman during a robbery.

Senate Releases TMI Report

WASHINGTON (AP) - The Senate released a report Monday on the 1979 Three Mile Island nuclear accident, calling for new safety measures to prevent similar disasters.

The report, which was commissioned by the Senate Committee on Energy and Natural Resources, said that the accident was caused by a series of design flaws and a lack of proper training.

Geneva Link Found In Stress

NEW YORK (AP) - A link has been found between geneva and stress, according to a report.

The report, which was published in the journal Nature, said that a certain gene in the body is associated with stress levels.

Chicago Slugger Also Rough On Women

West kind of a sports hero goes to the record books. He's had his share of rough experiences, but he's also had his share of success.

His name is Joe DiMaggio, and he's a baseball legend.

But DiMaggio's life was not without its challenges. In fact, he faced a number of difficulties that tested his strength and determination.

One of the most challenging times in DiMaggio's life was in 1941, when he was traded to the San Francisco Giants.

The move was seen as a personal and professional blow to DiMaggio, who had spent his entire career with the New York Yankees.

Despite the adversity, DiMaggio continued to play with passion and determination, and he eventually led the Giants to a World Series victory.

DiMaggio's resilience and determination have inspired generations of athletes, and his legacy continues to be celebrated today.

Draft Questions Answered

The Atlanta Braves won their fourth straight game as Warren Spahn
pitched a one-hitter against the Brooklyn Dodgers. The victory
was the 23rd of the season for Spahn, who lowered his
era to 2.25.

John L. Smith set a new record for the season
with 14 home runs and tied the majors with 98
 RBIs. He also led the league in batting average
with a .327 mark.

The Dodgers scored two runs in the fourth
inning to take the lead, but the Braves
countered with five runs in the fifth
inning to stake Spahn to the win.

Spahn allowed only one hit, a single to
Brooklyn’s Gil Hodges, in seven innings.
He struck out seven batters and walked
none.

Spahn’s performance was impressive,
considering he had not pitched since May 15.

“Spahn is a great pitcher,” said Dodgers
manager Walt Alston. “He’s been working
hard and he deserved this win.”

The Braves managed to score two runs
in the bottom of the fourth inning,
but were able to hold off the Dodgers.

“We had a good lead and we held on,”
said Braves manager Bill DeWitt. “Spahn
pitched a great game and we were able to
come through with some key hits.”

Spahn’s win was his 14th of the season,
and he now has a 2.05 earned run average.

The Dodgers, however, were unable to
match the Braves’ pace, and the game
ended with a 7-2 victory for the Braves.

The win moved the Braves to within three
 games of the National League lead, and
they are now tied with the St. Louis Cardinals
for second place.

The next game between the teams is scheduled
for the next day, with the winners moving on to
the championship round.

Cardinals 7, Pirates 5

The St. Louis Cardinals defeated the Pittsburgh
Pirates 7-5, to improve their record to 32-30.

Kansas City Royals 3, Minnesota Twins 2

The Kansas City Royals defeated the Minnesota
Twins 3-2, to improve their record to 28-34.

Patrol To Watch Closer

Fluorine is a gas that is being used in greater
quantities in the production of synthetic fibers.

The United States is one of the leading
producers of synthetic fibers, and the demand
for fluorine is expected to increase in the near
future. The gas is used in the production of
nylon, polyester, and other synthetic fibers.

The gas is usually obtained from coal gas
wells, but it can also be produced from coal
by distillation. Fluorine is a highly reactive
gas, and it is used in the production of
many other chemicals as well.

Convention '80
Republicans Have New Image, Old Candidate

By John Seigenthaler

The final days of the Republican National Convention here, which will select the party's presidential candidate, are set to begin today. The race for the nomination is down to two main candidates: Ronald Reagan and George Bush. Bush has been campaigning hard and is expected to win the nomination. However, Reagan is still a strong contender and could make a comeback. The convention is expected to be a close contest, with the final result likely to be decided on the floor. The Republicans are hoping to present a united front and to show that they are the party of the future.

Israelis Receive 1st F-16s

By John Seigenthaler

The Israeli government has received its first F-16 fighter jets, which are expected to boost the country's military capabilities. The F-16s are the latest in a series of arms sales to Israel, which is one of the most prosperous countries in the world. The F-16s are expected to boost the country's military capabilities and to help it deal with potential threats from its neighbors.
Oil Prices Hiked

NEW YORK (AP) — The price of crude oil surged to a record high yesterday, as traders speculated that the current supply crisis may continue for some time. The benchmark West Texas Intermediate (WTI) crude oil price jumped to $75.50 per barrel, overtaking Brent crude oil, which reached $73.80 per barrel. The gains came as the Organization of the Petroleum Exporting Countries (OPEC) announced its intention to keep production levels steady, despite widespread fears of a looming energy crisis. Analysts warned that the market may face further volatility in the near future.

Auto Losses 'Big'

BOSTON (AP) — The auto industry continued to suffer significant losses, with several manufacturers reporting quarterly profits down by more than 50 percent. The industry, which had been recovering from the pandemic, faced new challenges with the recent rise in oil prices and the ongoing supply chain disruptions. Ford announced a $2 billion loss for the quarter, while General Motors reported a 60 percent decline in profits. Analysts predict that the industry could see further losses in the coming months due to the ongoing geopolitical tensions.

Court Limits Safety Rules

WASHINGTON (AP) — The Supreme Court ruled yesterday that the federal government cannot enforce new safety regulations on state-regulated industries, a decision that will likely have significant implications for the auto and energy sectors. The court’s decision means that states will now have more leeway in setting their own safety standards, potentially leading to a patchwork of regulations across the country. The ruling is expected to have far-reaching effects on both industries, as they navigate the new landscape of federal oversight.

The Garden Where All Good Democrats Go

NEW YORK (AP) — The garden at the Democratic Party’s headquarters in Manhattan is said to be the most popular spot among party members. A recent survey revealed that 80 percent of Democrats claim that spending time in the garden helps them feel more connected to the party and its values. The garden is particularly popular among younger members, who find it a relaxing space to unwind and discuss political issues. The garden is open to the public every Saturday from 10 a.m. to 2 p.m. and is a must-visit for any Democrat looking to unwind in the heart of the city.
