Cuba Ignores U.S. Pleas

WASHINGTON (UPI) - Cuba has turned a deaf ear to last week's plea by U.S. President Carter to end the border conflict with the United States.

"We have not been successful so far in that," he said. The president said he and the government of Fidel Castro have failed to agree on a peace plan for the border conflict.

"We have been in touch with the Cubans on the border conflict since May," said Mr. Carter, "in an effort to work out a peaceful settlement that would satisfy the legitimate demands of the Cubans who wish to go back.""The Peaceful Solution"

The change will affect the school's middle school, which begins in the fall. The middle school will be closed for the rest of the year.

Stocks Suffer Big Loss

NEW YORK (1971) — Stocks suffered their worst day in five months Monday in a market that had already endured some sharp declines earlier this year. The Dow Jones average of 30 industrials fell 9.63 points, or 1.95%, to 484.63, the lowest close in nearly five months. The broader AMEX market and the NASDAQ complex also declined.

The shock wave spread across the country and around the world, with most major stock market indexes in the U.S. and abroad registering sizable losses. The drop in the Dow was the result of a combination of weak earnings reports, concerns about the global economy, and the on-going oil crisis.

The AMEX, which had been relatively resilient in recent weeks, fell sharply as well, with the composite index dropping 23.5 points, or 1.7%, to 1,350.5.

Market analysts attributed the decline to a variety of factors, including the continued rise in oil prices, which has led to higher inflation and tighter monetary policy. They also pointed to the weak earnings reports from many companies, which have contributed to a flattening of the profit outlook for the coming quarters.

The declines came as investors were already worried about the impact of the oil crisis on the economy. The worry was compounded by the news that the Fed had raised interest rates again, in an effort to cool the inflationary pressures.

The sell-off was widespread, with virtually every major sector of the market affected. The energy stocks took a hard hit, as the rise in oil prices continued to weigh on prices. The financial sector also fell, as the higher interest rates reduced the attractiveness of investing in long-term bonds.

The market was not alone in its concerns. Investors around the world were also feeling the pinch of the oil crisis and the tightening of monetary policy. The Dow in London fell 66.4 points, while the Japanese market slipped 115.5 points.

Despite the declines, some analysts saw opportunities in the sell-off. "This is a classic case of buying weakness," said one market analyst. "The sell-off is likely to be short-lived, as investors begin to see the longer-term benefits of the current recession."
