IRAN: IRAQI INVASION WILL AFFECT HOSTAGES

United Press International

The iranian parliament, breaking with tradition, has ordered the 60 US embassy, claimed thursday, and the US diplomats to leave on March 15, the 60th anniversary of the death of the leader of the revolution, Ayatollah Khomeini. The order was made by the 60-member body of the parliament, which is dominated by hardliners opposed to negotiations with the US. The parliament has also asked the government to shred its ties with the US and demands the release of all Americans held in Iran.

We consider the iranian attacks on American diplomats and citizens to be a violation of international law and an act of aggression. We demand the immediate release of all Americans held in Iran and an end to the support for terrorism in the region.

The US government has condemned the order and has stated that it will continue to negotiate with Iran to secure the release of its citizens.
